

- 4. Get Organized** In each box, give an example. (p. 385).

**4. Get Organized** In each box, give an example. (p. 385).

Absolute value	Adding	Multiplying	Conjugates
$ 3 + 4i = \sqrt{3^2 + 4^2} = 5$	$(2 + 3i) + (4 + 5i) = 6 + 8i$	$(2 + i)(4 + 2i) = 8 + 4i + 4i + 2i^2 = 6 + 8i$	The conjugate of $4 + 3i$ is $4 - 3i$.
