

Exponential Functions, Growth, and Decay

Lesson Objectives (p. 490):

Vocabulary

1. Exponential function (p. 490): _____

2. Base (p. 490): _____

3. Asymptote (p. 490): _____

4. Exponential growth (p. 490): _____

5. Exponential decay (p. 490): _____

Key Concepts

6. **Get Organized** Compare exponential growth and decay. (p. 493).

| $f(x) = ab^x$, where $a > 0$ | GROWTH | DECAY |
|--|--------|-------|
| Value of b | | |
| General shape of graph | | |
| What happens to $f(x)$ as x increases? | | |
| What happens to $f(x)$ as x decreases? | | |

Exponential Functions, Growth, and Decay

Lesson Objectives (p. 490):

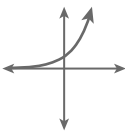

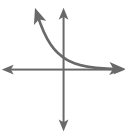

write and evaluate exponential expressions to model growth and decay situations.

Vocabulary

- Exponential function (p. 490): a function in the form $f(x) = b^x$.
- Base (p. 490): in the function $f(x) = b^x$, the base is b .
- Asymptote (p. 490): a line that a graphed function approaches as the value of x gets very large or very small.
- Exponential growth (p. 490): a function in the form $f(x) = ab^x$, with $a > 0$ and $b > 1$ which increases as x increases.
- Exponential decay (p. 490): a function in the form $f(x) = ab^x$, with $a > 0$ and $0 < b < 1$ which decreases as x increases.

Key Concepts

- Get Organized** Compare exponential growth and decay. (p. 493).

| $f(x) = ab^x$, where $a > 0$ | GROWTH | DECAY |
|--|---|---|
| Value of b | $b > 1$ | $0 < b < 1$ |
| General shape of graph |  |  |
| What happens to $f(x)$ as x increases? | $f(x)$ increases | $f(x)$ decreases |
| What happens to $f(x)$ as x decreases? | $f(x)$ decreases | $f(x)$ increases |
